CS1.301.M21 Algorithms Analysis and Design, Project

The project I chose to do is titled "**Algorithms for Humans**". A typical internet blog that uses clickbait and other techniques to gain views and reads. The blog a thinly veiled attempt at igniting a passion for learning algorithms in the general population. The blog lives in my medium.com profile. Following is the link to it:

https://medium.com/@george.paul

Hope you find it entertaining and informative!
